

# Snakes And Ladders

Name: Abhik Dey

Batch: C V Raman

A mini python project on a text-based Snakes and Ladders game using Python

## Table of contents

- o Technologies
- o Setup
- o Usage
- o Output

## Technologies

Project is created with:

- Python: 3.8.5

## Setup

To run this project:

1. Clone this repo.
2. Install Python
3.
  - o goto root directory where `main.py` file is present.
  - o Run `python -m flake8` command and check for any errors:
  - o output of the program is executed in the terminal window, pressing enter will make the move for each player

## Usage

Note: - please make sure you follow the commands properly

- Format to be followed
- To play the game press “enter” on the keyboard to make a move (throwing a dice) to start the game.
- After player A makes the move press “enter” again to make for player B.
- To make each move of the player the user has to press enter till the player wins the game.
- After each turn of a player the number “turn” is displayed.
- Followed by an alert, if the player (either A or B) encounters a “snake” i.e. the head of a snake, it is moved back to its tail position
- Similarly, if a player encounters a “ladder” it is moved to its tail position.
- After each successful move, the position of the player is displayed along with the number of turns used.
- After reaching an “outbound” limit i.e. reaching a number higher than 100, the player stays on the same position as it was before making the move.
- After a player reaches the final position of the board i.e. 100, a display alert is shown to show which player has won the game.
- After a player wins the game the program stops.

## Output

Output for a regular turn:

```
-----Turn : 3-----  
Player A has rolled a 3  
Player A has been moved from 9 to 12  
Player B has rolled a 2  
Player B has been moved from 10 to 12
```

### Output for a Ladder encounter:

```
-----Turn : 29-----  
Player A has rolled a 4  
Player A has been moved from 91 to 95  
Player B has rolled a 2  
Player B has been moved from 68 to 70  
--ENCOUNTER : LADDER -> CLIMB TO 79--  
Player B has been moved from 70 to 79
```

### Output for out of bounds:

```
-----Turn : 33-----  
Player A has rolled a 2  
Player A has not been moved from 100 to 102 <OUT OF BOUNDS>  
Player B has rolled a 4  
Player B has been moved from 69 to 73
```

### Output for Winner :

```
-----GAME OVER-----  
Player B Has won the game after 64 turns  
-----GAME OVER-----
```

### Output for Snake encounter:

```
-----Turn : 11-----  
Player A has rolled a 5  
Player A has been moved from 24 to 29  
Player B has rolled a 6  
Player B has been moved from 31 to 37  
--ENCOUNTER : SNAKE BITE -> GO TO 13--  
Player B has been moved from 37 to 13
```
